## **iClinical - Minerva**

Chatbots for pharmaceutical companies

### **Trial assist**

- Real time chatbot to assist principal investigators in clinical trials.
- The chatbot scours all the trial documents (protocol, SOPs etc) to provide real-time trial information

#### **Inclusion criteria**

Patients eligible for the trial must comply with all of the following at randomization:

- Age  $\geq 16$  years
- Current admission under the care of the heart-failure service at the site

### **Physician and patient assist**

- Provides doctors and patients drug information when they need it.
- It could be dosages, instructions for use or adverse events information.
- Video and photographs can provide additional information on demand.

#### **Dosage forms**

Ferrlecit is supplied in a single use vial containing 62.5 mg of elemental iron in 5 mL.

### **Sponsor assist**

- Summon trial related information from a chatbot
- The information can be from documents or the analytics for clinical trials.
- They can skip the tedious task of sifting through trial documents or running individual reports for trial analytics.

#### **Top ten adverse events**

Insomnia	201
Back Pain	135
Nausea	95
